EXPERIENCE

Cornerstone Engineering Solutions

Dec 2024 – Feb 2025

Mobile Application Developer Intern

- Engineered and deployed role-based access systems using Firebase Authentication.
- Integrated Firebase Realtime Database for dynamic, location-based tracking features.
- Applied the BLoC pattern for scalable, maintainable state management across modules.

JSK Tax Consultants

Chennai, India · May 2025 – June 2025

Application Developer Intern

- Built and deployed a Windows application in Flutter, integrated with Firebase backend services.
- Designed the Firestore schema, configured authentication, and enabled real-time data operations.
- Deployed via Firebase Hosting for scalable, reliable delivery.

PROJECTS

StayTrack — PG / Hostel Management App

React Native, Expo, Firebase

- Runs an entire paying-guest property from one real-time app — rooms & occupancy, tenants & rent, staff & payroll, expenses & maintenance.
- Owner-scoped Cloud Firestore with hardened security rules; real-time listeners into Zustand state; 44 unit tests. [Live on Firebase Hosting](#).

Finmatrix — Client Management App

Flutter, Flask, MongoDB

- Full-stack business app to manage client data and track work status from one centralized dashboard, with forms for updating services and monitoring progress.
- Flask + MongoDB backend for secure, efficient data operations across the client workflow.

BusBuddy — School Bus Management

Flutter, Firebase

- One login fans out into three role apps (admin, parent, driver) over a shared Firebase backend.
- Real-time GPS tracking, QR-code attendance, and analytics; 204 unit tests.

Other projects: GymOS — offline-first workout & nutrition tracker (React Native, Expo, SQLite).
