PROFILE

Aspiring application developer with a strong foundation in Flutter, backend integrations, and database systems. Passionate about building robust, user-friendly applications across platforms, focusing on clean architecture and scalable design.

EDUCATION

Bachelor of Engineering in Computer Science

St. Joseph's Institute of Technology, Chennai

Expected 2026

CGPA: 7.7

Higher Secondary Education

St. John's Public School, Chennai

Aug 2022

TECHNICAL SKILLS

Languages	C, Java, Python, Dart
Frameworks	Flutter
Tools	Git, GitHub, Figma
Databases	MongoDB, Firebase, SQL

EXPERIENCE

Cornerstone Engineering Solutions

Mobile Application Developer

Dec 2024 – Feb 2025

- Engineered and deployed role-based access systems using Firebase Authentication.
- Integrated Firebase Realtime Database for dynamic location-based tracking features.
- Applied BLoC pattern to achieve scalable, maintainable state management across modules.
- Enhanced backend API integrations, reducing latency and improving reliability.

JSK Tax Consultants

Application Developer Intern

Chennai, India

May 2025 – June 2025

- Developed and deployed a Windows application using **Flutter** integrated with **Firebase backend services**.
- Built Firestore database schema, configured authentication, and enabled real-time data operations.
- Hosted the application using Firebase Hosting for scalable and reliable deployment.
- Tech Stack: Flutter, Firebase, Firestore, Firebase Hosting.

PROJECTS

Finmatrix – Client Management App

Flutter, MongoDB, Flask

- Architected and built a business app for managing client data and tracking work status in a centralized system.
- Developed intuitive forms and dashboards for updating service details and monitoring client progress.
- Integrated Flask backend APIs and MongoDB to ensure secure, efficient data operations.

BusBuddy

Flutter, Firebase

- Developed a real-time college bus tracking and scheduling app with role-based access for admins, drivers, and students.
- Implemented live location sharing and optimized database queries for faster updates.
- Leveraged Firebase Authentication and Realtime Database for secure, scalable backend.

Lotus – Tenant & Room Management System

Flutter, Firebase

- Designed and developed a mobile app for managing tenant data, room assignments, and electricity usage records.
- Enabled CSV export functionality to streamline reporting and data sharing.
- Crafted modern UI with theme switching (dark/light) to improve user experience.
